(By Associated Press.) "Hill money" a sum greater than 3 or 4 per cent of their liabilities, while in the United States the average is 10 per cent. The London banks, however, have neither in their own vaults nor in the Bank of England, over 14 or 15 per cent of their deposits.

SECOND VICTIM OF HAMPTON STOPE IS RECOVERED

BODY OF BERTSCH IS FOUND BY MINERS—SEARCH WILL CONTINUE The body found in the ruins of the Hampton stope of the Combination mine at Goldfield, by the party of searchers Saturday morning, was finally freed from the rock and timbers that held it, late Saturday evening, and was taken to the undertaking parlors of T. F. Dunn. The identification was made complete Saturday night, as locker key No. 128 and a gold watch, found in the dead man's pockets, and tattoo marks upon one arm showed that the body was that of W. J. Bertsch. The body had not been as badly mutilated as was at first thought by the men who found it, and although terribly crushed, had not been dismembered. An inquest on the remains will be held Tuesday morning at 10 o'clock. No funeral arrangements have as yet been made, although it is probable that the body will be buried in the local cemetery. The dead miner was a member of the Cripple Creek lodge of Elks. The body of Matt remains in the underground workings, but as the searching party is now searching close to where he must have been working when the slide occurred, the finding of the body is probably but a matter of a few hours.

A vigorous denunciation of the use of labor injunctions in detail and a trial by jury were embodied in the council's report today.

SHIPS IN COLLISION CAUSE SEA DISASTER

Meagre Details are Told by Two Filipino Survivors Who are Picked up.

(By Associated Press.) NEW YORK, Nov. 9.—Belated news of a disaster at sea in which probably eleven lives were lost, was brought to New York today. Six members of the crew of the barkentine John S. Bennett, bound from New York to Halifax with a cargo of coal, were drowned early Monday morning when the vessel was sunk in a collision off Block Island with a four masted schooner, supposed to be the Merrill C. Hart of Thomaston, Me. The schooner is also believed to be lost, with all of its crew of five men. Meagre details of the disaster were brought today by Captain Bullock of the schooner William Jones, which picked up two Filipino sailors of the Bennett. Bullock said that on Monday morning as he was passing Block Island he made out the lights of a vessel, the captain of which hailed him and asked for assistance, saying his barkentine had been in a collision and was sinking. Captain Bullock immediately came about and made ready for the rescue, but before a small boat could be put over, the barkentine had vanished, and nothing but bits of wreckage could be seen. The Filipinos were clinging to a dory when picked up.

HYPNOTIC SUBJECT DIES WHILE IN A TRANCE

Hypnotist Jailed Charged with Murder—May Make Novel Plea for Defense.

(By Associated Press.) SOMERVILLE, N. J., Nov. 9.—Ahtruh Everton, a self-styled "professor," a traveling hypnotist, is in jail tonight following the death of Robert Simpson, a former street car conductor of Newark, last night at a performance at a local theatre. While the hypnotist sobbed in his cell, several local physicians witnessed a weird performance at the morgue, where William E. Davenport, secretary to the mayor of New York, and a student of hypnotism, vainly tried to bring back signs of life to the rigid body of Simpson. Simpson was apparently dead after being put into a cataleptic state by Everton, and it was at the piteous instance of the hypnotist, after his ineffectual attempts to revive Simpson, that Davenport was using the power of suggestion and spoke in the dead man's ear: "Bob, your heart action, your heart action is beginning, it is beginning—I saw it!" Slowly and dramatically Davenport repeated this in the ear, and then changing his tone of voice to an imperious command, he cried: "Bob, can't you hear me, your heart is beginning to beat!" Again and again he repeated this to the in-

mate form, but not a muscle stirred and finally he gave it up. Eight physicians who performed an autopsy said that death was due to a rupture of the aorta. The coroner said the man had probably been suffering from an aneurism. Everton has retained counsel. It is suggested that he may make the novel plea that the man was still alive when the autopsy was performed.

SHERIFF CANNOT SERVE SUBPOENAS BECAUSE OF BIAS

AUBURN, Cal., Nov. 9.—The trial of Alma Bell, charged with the murder of Joseph Armes, which is now in the early stages, was brought to a halt this afternoon by an attack of Attorney Chamberlain for the defense upon the special venire summoned today. Judge Arnold sustained the objection of counsel by a ruling that Sheriff McAuley was disqualified, because of his bias against the defendant, from summoning prospective jurors, and ordered the venire dismissed. Coroner Bisbee, upon whom the sheriff's duty devolves, was also found to be partial, and after a conference with counsel the court directed that George West of Roseville be requested to forward qualifications to act as juror.

(By Associated Press.) ALBANY, Nov. 9.—Betting is a crime only when it is accompanied by a record or registry or the use of some part of the paraphernalia of professional gamblers, according to a decision handed down today by the court of appeals. In effect the decision holds that oral betting does not constitute bookmaking and a violation of the anti-race track gambling law. The court affirms the order of the lower court for the discharge from custody of Orlando Jones and Sol Lichenstein, who were indicted by the Kings county grand jury on a charge of bookmaking.

CHARGED WITH MISAPPLYING FUNDS OF OAKLAND BANK

(By Associated Press.) SAN FRANCISCO, Nov. 9.—As a result of the failure of the Union National bank of Oakland, Thomas Prather, formerly president of the institution, and former Congressman Warren English, who was a director of the bank, surrendered themselves to a United States marshal here today when they learned that he held warrants against them on indictments drawn by the federal grand jury charging them with misapplying funds of the bank.

The indictments were returned secretly several days ago, but no attempt was made to serve the warrants until today. Both were released under \$5000 bonds.

The bank in which the alleged frauds were committed, was acquired in August, 1906, by the California Safe Deposit and Trust company. Shortly after that institution failed the Oakland bank suspended business. The two bankers were jointly indicted on a charge of making various dummy loans.

ROUND MOUNTAIN MINING MAY ORDER A STEAM SHOVEL

PREPARING TO "GLORY HOLE" THE PROPERTY IN NORTHERN CAMP

The Round Mountain Mining company is about to introduce the system of steam shovel work in its famous property that is said to have ore ranging from hundreds of feet on the surface for a depth of 40 feet, a body of ore that runs between \$5 and \$7 a ton average values. This information was conveyed to this city yesterday by arrivals from the placer camp, who say that the property is looking better every day. Some of the stuff runs far better than the values mentioned above, and it is claimed that by taking it out in a body and then screening the coarser parts the product will have a milling value of between \$10 and \$15 per ton. Manager James R. Davis is now figuring on the details of the plan, and if the quantities hold out it is not far distant when the mill will have to be enlarged. During the month of October the gross returns exceeded \$40,000. The management may decide to "glory hole" the mine, and thus turn it into a quarry that will be worked by churn drills.

NATIONAL MILL AT RAWHIDE TO BE ENLARGED

(By Special Correspondence.) RAWHIDE, Nov. 9.—The National Ore Purchasing and Reduction company is negotiating with the Nevada Machinery and Supply company of Reno for the installation of a filter plant in connection with their cyanide plant here, designed to handle 40 tons of slimes per 24 hours. The Burt filter now in use has not proved practical for the ores of the district. All during the past week, plans pro and con were discussed for the improvement of the mill, as to changes, additions, etc. E. W. King, on leaving for New York, states that his trip is made for the purpose of perfecting arrangements for the installation of a 20-stamp mill in place of the National now working. The National company was unable to finance the expensive changes in the mill, and consequently the necessary cash is advanced by the Queen company and Mr. King as an individual. They will take a mortgage on the plant and the improvements will at once be added. Mr. King is extremely anxious to have the mill at work on the reduction of ores of the district and working in a satisfactory manner, and it is with this end in view that the money was advanced and his trip east made at this time. It is safe to say that if Mr. King takes the proposition in hand it will receive his personal attention and it is certain that the mill proposition looks more favorable today than it has at any time in the history of the camp.
